Dropbox Search Tool

Ryan Ahler, Devon Current, and Allison Hartman

Demonstration of Iteration 3

Meeting Details

- Clients had few critical thoughts.
  - Wanted the k tag to be changed to f to represent the word file.
- Through our videos, demonstrations, and notes they were able to understand how it works.
- [Access to Dropbox](#)
  - We were given access to their public education content
  - Unable to access the full dropbox due to security reasons

Meeting Details

- Testing
    - We are to let them know when we are ready to deploy and test
    - We need to provide a form so we have consistent data
    - They would also like us to kickoff testing by providing a demo to employees
- We can include anything we need to in our poster as long as it does not grant access to their information

The Team

- Work Breakdown
  - Devon worked on file type search and recent file search
  - Allison worked on documentation and symposium poster
  - Ryan worked on the file content search and tests

Final Iteration

- Create an easier installation process.
  - Will allow future users to focus more on the product than the installation.
- Implement the bot onto TDG's system.
- Test our bot and receive feedback from TDG.
  - Potentially fix any bugs found, if there is time.
